

KHODABUX A. NAZEEM - SENIOR FULL STACK DEVELOPER

11b, rue Abbée Laval • Curepipe, Mauritius • khodabux.n@gmail.com • +230 59719445

• [linkedin.com/in/nazeemkhodabux](https://www.linkedin.com/in/nazeemkhodabux) • github.com/nazeemK • cursor.com/@nazeemk

Summary

Senior Developer who has independently architected and led production systems across e-commerce, ERP, real estate, and agency environments for over a decade. Hands-on across the full stack with serious practical experience in AI-driven workflows, LLM integrations, and the agentic stack including MCP and A2A. Drawn to environments that reward ownership and technical depth.

Skills

Languages & Frameworks: JavaScript/TypeScript, Node.js, Express, PHP, Python

Frontend: Angular (1, 16+), Vue.js/Nuxt, React, Bootstrap, Tailwind CSS, jQuery

Backend & APIs: REST, GraphQL, FastAPI

Databases: MySQL, MSSQL, MongoDB, Redis/KeyDB

DevOps & Cloud: Docker, Git, CI/CD, AWS, DigitalOcean, Cloudflare, Traefik

AI & Agents: Claude/OpenAI APIs, A2A, MCP, Fine-tuning, Prompt Engineering, Unsloth

Tools & Concepts: Playwright, GSAP, Three.js

Experience

DRAGON ELECTRONICS LTD

Port-Louis, Mauritius

Senior Full Stack Developer

Jun 2025 – Present

- Led full migration of an 8-year-old legacy PHP e-commerce system to a modern VueJS headless architecture in under a year, owning all technical decisions - GraphQL schema design, schema provisioned for future scalability, and headless approach selection
- Cut average monthly bounce rate from 40-50% to the 30-35% industry benchmark, correlated with 500%+ improvement in page-load speed
- Reduced VPS costs by ~50% (projected 10-year savings) through an efficient CI/CD pipeline and lightweight audited WooCommerce core
- Built custom search preloading only 16KB of index data on first load, returning results in microseconds
- Integrated local payment gateways and Rogers Capital (credit/financing) API with server-side webhook handlers for asynchronous payment confirmation
- Automated weekly/monthly marketing reports aggregating GA4, Search Console and Meta Pixel APIs; added component-level analytics to track user behaviour
- Enforced security best practices across integrations and mentored junior developers via code reviews, PR feedback, and hands-on guidance
- Implemented zero-downtime dual-server failover setup using automated database replication, rsync file sync, and a load balancer with active health checks for seamless traffic routing at zero recurring infrastructure cost

Tech stack: Nuxt 3, Vue 3, GraphQL, WooCommerce, MySQL, Nitro, Node.js, Tailwind, CI/CD

UNICONSULTS LTD

Curepipe, Mauritius

Full Stack Developer

Sep 2024 – Jun 2025

- Onboarded into a large-scale modular ERP codebase (HR, payroll, accounting, reporting) and reached active feature contribution in 6 weeks vs. the standard 9-week ramp
- Developed and maintained Leave Management, Payroll, and HR modules within a tightly interconnected multi-repository system where changes required careful cross-module impact analysis
- Collaborated across developers at all seniority levels, contributing to code reviews, PR feedback, and cross-team coordination on shared ERP domains
- Wrote unit tests and authored testing instructions for QA testers, improving coverage and reducing regression risk across interdependent modules
- Maintained and improved CI/CD pipelines and Docker environments
- Produced internal developer documentation
- Participated in a mandatory weekly knowledge-sharing rotation, independently preparing and delivering technical sessions to the broader development team

Tech stack: Angular.js, Node.js, ExpressJS, PHP, MySQL, Sequelize, Docker, Bootstrap, REST APIs, CI/CD

IMPETUS DIGITAL LTD

London, UK

Full Stack Developer

May 2022 – May 2024

- Served as technical lead across all client projects, selecting frameworks and tools based on project requirements and client demands
- Delivered Three.js and GSAP-driven interactive experiences for premium brands including Porsche, Mont Choisy Le Parc, Rogers Hospitality, 20 Degres Sud and DEV Groupe
- Cross-collaborated with external contractors across content and development workstreams to deliver projects end-to-end
- Built and managed automated health checks and performance optimisations across all client sites via agency hosting infrastructure
- Operated in a hybrid developer/account management capacity, attending client-site meetings and managing delivery directly

Tech stack: React.js, Node.js, PHP, MySQL, Bootstrap, Three.js, GSAP, Git, Zapier

PAM GOLDING PROPERTIES LTD

Pointe aux Cannoniers, Mauritius

Full Stack Developer

March 2020 – March 2022

- Architected middleware APIs bridging a 30-year-old legacy real estate management system to a modern web frontend, enabling live data access without touching the core system
- Designed system architecture with no existing precedent, making all technical decisions independently
- Implemented multi-currency daily price synchronisation, query caching, and automated image compression pipelines from scratch
- Built custom analytics dashboards and optimised infrastructure for SEO and page performance
- Delivered additional microsites, blogs, and landing pages with automation capabilities

Tech stack: PHP, MySQL, Bootstrap, jQuery, PWA, API services, Zapier, Git, GA, GSC

ARM MAURITIUS LTD

Albion, Mauritius

Full Stack Developer

March 2017 – January 2020

- Built full-stack web applications including real estate and e-commerce platforms
- Developed custom features including booking systems and interactive UI components
- Managed servers, DNS, Cloudflare, email systems, and deployments
- Integrated third-party APIs and analytics tools
- Provided technical training and documentation for internal teams
- Debugged and maintained production systems

Tech stack: Wordpress, PHP, MySQL, Apache, Linux, jQuery, APIs, CRON

Education

BCS Chartered Institute of Technology (UK)

2014

Beau-Bassin, Mauritius

Diploma in Information Systems

University of Cambridge (UK)

2010

Floreal State Secondary School, Mauritius

High School Certificate
